Chairman and CEO Commentary

Mr. Hashim Shawa, Bank of Palestine Group Chairman's statement:

"I would like to assure our shareholders and stakeholders that the Bank's management has been working tirelessly to sustain our operations and to serve our clients at home despite continued challenges posed by the war in Gaza and escalation in the West Bank during the second quarter. We have not been deterred from implementing our strategic plans in light of these challenges at home. Our regional expansion into the MENA and GCC regions is underway. We have received approval by the Central Bank of Egypt to open a representative office in Cairo and we anticipate full operation in the last quarter of the year 2024. We have launched the process of applying for a booking center license in the Abu Dhabi Global Market-ADGM while enhancing our institutional relations in the UAE and the rest of the GCC as part of diversification and targeting our diaspora clients. The bank has managed to attract strategic investors to help raise its capital. We have completed a capital increase of \$ 34 million through onboarding IFC and EBRD as shareholders in the bank through special shares issuance. This capital increase will help preserve our capital adequacy ratio as per our standing as a systemic bank and will allow us to compensate for decreased profitability due to the impact on the economy by the ongoing war. We will continue to work on additional capital increases to position the bank as a leader in future economic recovery and reconstruction."

Mr. Mahmoud Shawa, Bank of Palestine CEO's statement:

"The second quarter of 2024 saw continued extra credit provisioning as the bank dealt with the continued impact of the war in Gaza. Our measures included provisioning for cash losses and other asset losses in Gaza as the war continued unabated. We have applied extra prudence in dealing with compounded risks and uncertainty through added mitigation to maintain our continued operations and liquidity ratios at par with regulatory requirements and best accounting practice. Despite our focus on risk mitigation and dealing with the imposed risks, our teams remain focused on digital transformation and customer care, financial inclusion, and operational efficiency at our home operations. We are implementing our regional expansion to drive growth through diversification and attracting diaspora business. We remain well positioned with liquidity buffers and strong capitalization to position the bank for the day after economic recovery and reconstruction."
